The program should work according to the following algorithm:

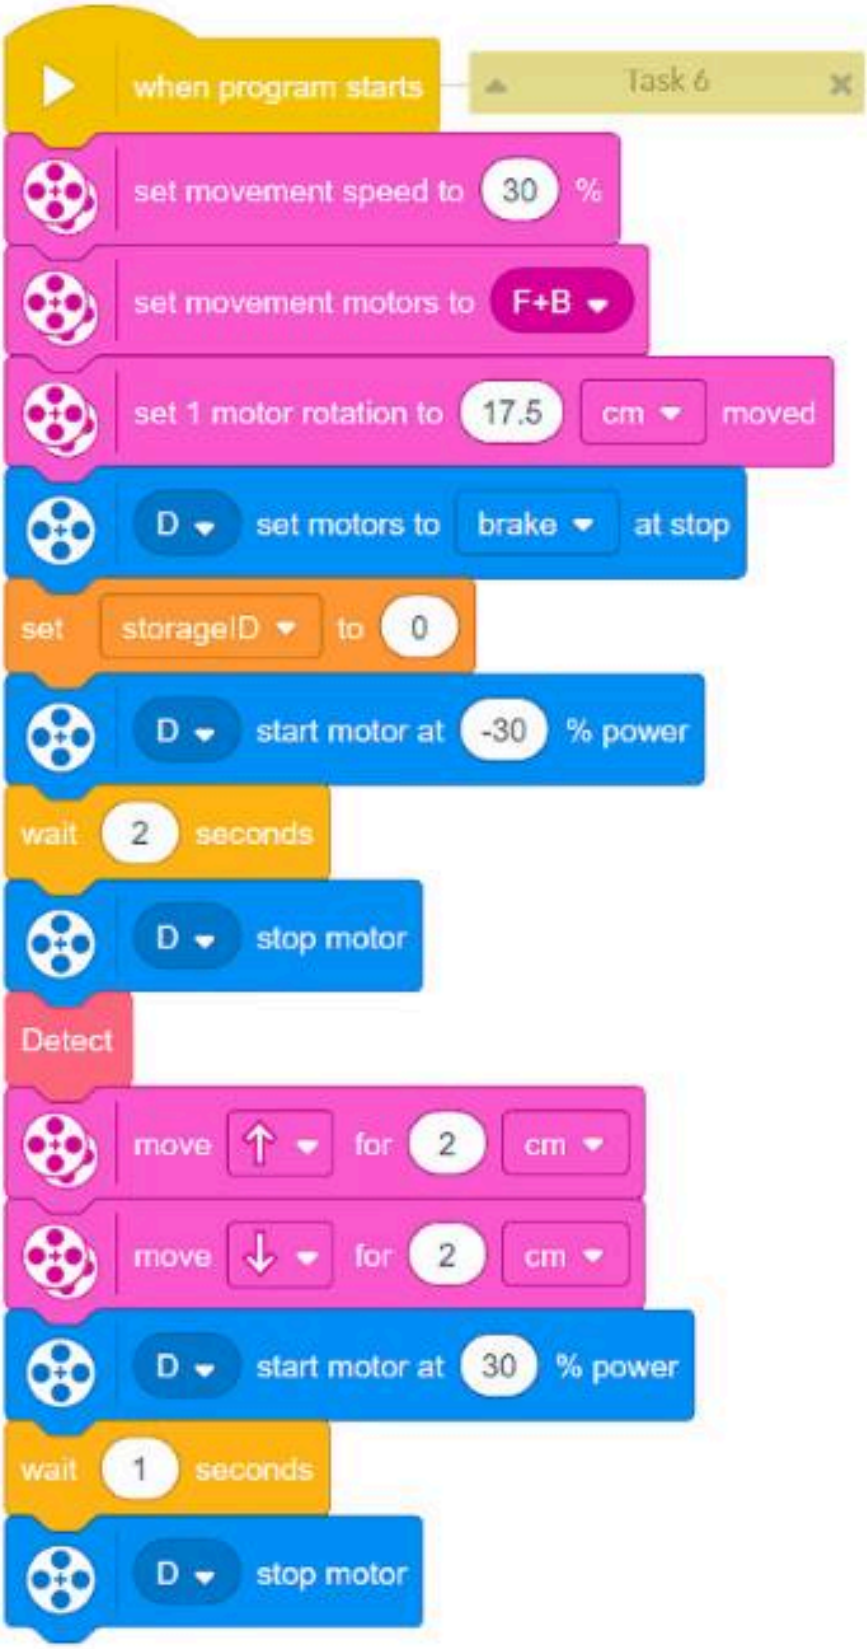

roboti

when program starts
Task 1
D
set motors to
brake
at stop
D
start motor at
-30
% power
wait
2
seconds
D
stop motor

when program starts
Task 3
set movement speed to 30 %
set movement motors to F+B
set 1 motor rotation to 17.5 cm moved
D set motors to brake at stop
D start motor at -30 % power
wait 2 seconds
D stop motor
start moving
wait until C is color ?
stop moving
move for 2 cm
move for 2 cm
D start motor at 30 % power
wait 1 seconds
D stop motor

define Detect
move for 6 cm
repeat until C is color ?
start moving 30 - C reflected light * 2 at 40 % power
move for 5 cm
if C is color ? then
set storageID to 2
else
if C is color ? then
set storageID to 1
else
if C is color ? then
set storageID to 1
else
if C is color ? then
set storageID to 3
else
if C is color ? then
set storageID to 3

when program starts
Task 6
set movement speed to 30 %
set movement motors to F+B
set 1 motor rotation to 17.5 cm moved
D set motors to brake at stop
set storageID to 0
D start motor at -30 % power
wait 2 seconds
D stop motor
Detect
move for 2 cm
move for 2 cm
D start motor at 30 % power
wait 1 seconds
D stop motor
